

Acquisition Brief — bciaccess.com

Domain name / Asset offered: bciaccess.com (*primary asset; no other extension included by default*)

Purpose: acquisition of a **strategic banner** for **BCI access & consent protocols** (interoperability, authorisations, privacy-by-design), aligning **R&D, Product, Legal, Security** and partners.

This document — who it's for, why

Decision-grade brief for **CEO / COO / CFO / CTO / Regulatory & Compliance** (neurotech, medtech/BCI, digital health, deeptech).

Thesis: using the exact category name creates operational and reputational edge.

BCIACCESS.COM is the neutral, memorable banner to standardise **access, consent and interoperability** across BCI.

1) One-page decision

What it is. A **strategic asset** (.com) for **BCI access & consent**: public portal, neutral references, resources, ecosystem voice.

What it changes. A **single entry point** → clearer authorisation governance, higher stakeholder trust, faster integrations.

What you can deploy today.

- **“BCI Access — Readiness & Rollout.”** Access-journey mapping (clinical/experimental/consumer), consent models, logging.

- **Resource center.** Authorisation templates, interoperability patterns, privacy & security good practices.
- **Ecosystem voice.** Use cases (clinical/rehab/assistive/industrial), milestone calendar, neutral FAQ.

Why it's defensible. Exact term with C-suite readability.

2) Context & milestones

2025–2030: scaling of **BCI pilots** (clinical & non-clinical), rising expectations on **explicit consent, traceability, safety** and **interoperability**; buyers/partners ask for **proof of governance** and **third-party management**.

Implication. Immediate need for a neutral banner to orchestrate **access processes, authorisation frameworks, privacy-by-design** and supplier integrations.

3) Three concrete deployments

A. Enterprise / Group program. Access & authorisation governance, consent registries, partner integrations.

B. Scale-up / BCI vendor. Instant credibility with hospitals/labs/partners; shorter cycles.

C. Alliance / Institution. Shared references, interoperability patterns; **network effects**.

4) Strategic edge of the asset

C-level clarity. **Defensive** (exact-match .com, readable, memorable). **Re-use** of content, templates and relationships on a single surface.

5) Market size & pressure

Neuro/BCI investment momentum and demand for **safety & governance** (consent, security, traceability) call for a **narrative standard** and a **visible hub**; **BCIACCESS.COM** provides both.

6) CFO anchors (obligatory)

6.1 Alternative cost — awareness & adoption. Without an exact-match: 6–12-month campaign, internal brand architecture, change management.

6.2 Cost of delay. Slip one budgeting cycle = integration rework, lost partner dossiers, legal friction.

6.3 Reusable synergies. Under a **single banner**, each euro (content, templates, connectors, relationships) is **re-used** → shorter time-to-trust, faster cycles, lower unit costs.

7) Investment logic (no public pricing)

SEO & memorability (exact term). **Strategic premium** (2025–2028 window). **Budget lens:** instead of spreading budgets across campaigns/change, a **single asset** accelerates ecosystem adoption and reduces trust-acquisition cost.

8) Acquisition options (deal structure)

Simple scope: bciaccess.com only.

(No other extensions or names included.)

9) Clean acquisition process (Legal/Finance)

Escrowed transaction, fast technical transfer, invoice.

Payment: **cash** or **staggered 40-30-30**; **NDA** and asset audit available.

Legal notices: descriptive names, **no affiliation**; **no medical claims**.
